

Every second counts in an emergency!

Proven, Customizable, & Affordable mobile tools to empower EMS and Medical Teams

GoBox is a portable, one-box solution for linking on-scene out-of-hospital care and distant providers with e-Bridge Mobile Telemedicine. e-Bridge represents a major advance in responses to natural and man-made disasters, multi-casualty incidents, triage, mobile integrated healthcare and community paramedicine. Medical specialists can be "virtually present" to assist in collaboration with field providers for the right care, in the right place, at the right time. The Go-Box fully integrates with GD's CAREpoint for complete solutions.

What it Includes
