

# GD FINDS GRANT FUNDING FOR YOU

GD improves healthcare by developing the most comprehensive, interactive and widely-used mobile telemedicine, communication, and notification solutions for pre-hospital and hospital environments. While quite affordable (especially when you consider other offering's hidden costs), we do understand you sometimes do not have the budget to employ our solutions - plainly and simply. This is why we have a rigorous and comprehensive **Grant Advocacy Procurement Program (GAPP)** supported by GD financial specialists, which researches viable government grants on your behalf to augment the cost of our products. These grants span the state or federal level, and we have deep expertise at identifying those that pertain to medical organizations. These grants all offer financial support in the areas of health-care and emergency medicine, thereby covering our CAREpoint and e-Bridge

products. We have found many of these government funded program are listed under the guise of a range of topics (although they do offer the funding support you'll need) spanning areas such as:

- Emergency medicine
- EMS & Trauma Emergency
- Rural healthcare
- Advancing wellness
- Physician Incentive
- Health and Family
- Consumer Health Advocacy
- Community-centered health planning
- Comprehensive Primary Care
- Health non-profits
- Rural community assistance
- Small business
- Ribbon of hope

**We provide all of the details, links, amounts and contacts you need to easily and quickly submit the application(s) to secure your funding.**

Let us help you find the funding you need to procure and employ GD's solutions so you can begin enhancing workflows, improving communication, reducing costs, boosting productivity and improving patient outcomes.
