

TRACKING & Real Time ETA

EVERY SECOND COUNTS IN AN EMERGENCY!

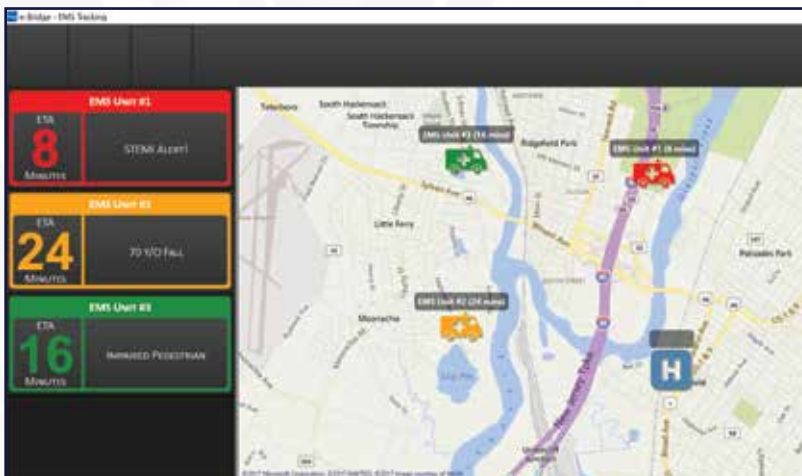

GD e-Bridge™, GD's award winning secure messaging and mobile telemedicine app now provides real-time ambulance ETA tracking and mapping. For optimal patient care and fast turn-around time, the hospital emergency department needs to be prepared for the incoming patient. Now with a simple click, GD e-Bridge™ technology allows hospital staff view the ambulance location and ETA live, so they can be best prepared for your arrival right down to the second. That's Responsive Innovation the GD way.

With GD e-Bridge™ Mobile Telemedicine app, share HIPAA-secure voice, text, photos, data, video clips and stream live with confidence and ease using your smartphone, tablet, Toughbook or PC. Plus capture and send vitals and medical data, record and log for quality assessment, training and medical-legal documentation. Fully compatible with GD CAREpoint Workstation™.

GD is the trusted leader in EMS-hospital communications and Mobile Telemedicine systems for over 30 years, connecting care providers nationwide and handling thousands of emergency calls daily.

Right Care. Right Place. Right Time

SIGNIFICANTLY REDUCE PATIENT HANDOFF AND EMS WALL TIME
