

HOSPITAL ED WORKSTATION

Features and Benefits

GD CAREpoint™ ENHANCES COMMUNICATION BETWEEN EMS, HOSPITALS AND PHYSICIANS BY INTEGRATING COMMUNICATIONS, INFORMATION, DOCUMENTATION, 12-LEADS, TELEMEDICINE + MORE

- Provides quicker call response and virtually eliminates missed calls.
- Reduces cost by streamlining and improving pre-hospital processes.
- Consolidates, interfaces and enhances all EMS communications.
- Improves EMS patient information, documentation and reporting.
- Improves preparation for patients reducing time to treatment.
- Provides CQI trending data on calls and activity reporting.
- Integrates a secure cost effective mobile telemedicine solution.
- Improves the EMS and hospital working relationship.
- Unified 12-lead management - brand agnostic.
- Captures patient refusals.

WHY GD CAREPOINT™ WORKSTATION?

Emergency departments should be equipped with the best technology to ensure they're ready for anything and with GD CAREpoint™ Workstation, you'll never miss a beat. Receive, respond, forward and document phone and radio calls, faxes, emails, 12-Lead ECGs and all other EMS to hospital communications and information on one easy-to-use, HIPAA-secure system. All GD CAREpoint™ data is automatically recorded, logged, time-stamped and immediately available for instant playback to answer urgent questions or for later review. Be in the forefront with GD CAREpoint™ Workstation.
