

EMS ADVANTAGE

From GD Mobile Telemedicine

TOGETHER, GD SOLUTIONS ENABLE EMS + HOSPITALS TO:

- Cross team communication
- Resolve disputes + prove patient treatment refusals
- Remote access to the EMS Radios
- Virtually place physicians at the trauma scene
- Full case management + event time-stamping
- Reduce patient handoff times + challenges
- Easily pinpoint bottlenecks
- Minimize risk while reducing costs
- Shorten door-to-treatment times by accessing online medical control

FASTER DOOR-TO-TREATMENT TIMES, ENHANCED FIELD TREATMENT + BETTER PATIENT OUTCOMES

Both the paramedics, EMS organization, and the hospital's they're driving to will derive significant benefits from GD's solutions. In short, EMS can instantly share data with the hospital and alert the ED of their impending arrival. This speeds patient handoff time, leads to faster team and lab activation and reduces medical error. Our mobile telemedicine and all-in-one communication, documentation and notification system create a holistic, interconnected process of accurate and timely information and communication flow from the field right into the electronic health record so it can be shared with the full medical team throughout the hospital and the continuum of care.

In many cases, our hospital clients deploy our solutions and empower EMS organizations to use them at no charge. If the hospitals you support don't already use the GD CAREpoint™ all-in-one EMS and Hospital workstation, and our GD e-Bridge™ (feature-rich mobile telemedicine app), then you ought to inquire about it. You and the hospital will benefit tremendously, as will the patients you serve.

THE MOST COMPREHENSIVE TEAM COMMUNICATION APP IN THE MARKET:

- Interactive mobile telemedicine
- Patient vitals sharing and reporting
- Medical team alerts, notification + chat
- Call/radio and interaction recording
- Unified 12-Lead management
- Instant recall and replay
- Data sharing
- ETA tracking
- Video streaming
- and so much more

WITH GD MOBILE TELEMEDICINE, HOSPITALS AND EMS ENHANCE PATIENT OUTCOMES AND TEAM EFFICIENCY WHILE REDUCING COSTS AND LIABILITY
