

# ET3

Emergency Triage, Treat & Transport

Finally  
**RIGHT CARE • RIGHT TIME • RIGHT PLACE**  
with aligned payment

## What % of your patients don't need to go to the hospital?

### What is ET3

ET3 is CMS payment model that will provide greater flexibility to EMS ambulance care teams, enabling transport to an alternative destination, or provide treatment on-scene using mobile telemedicine with a care practitioner. The model will allow appropriate emergency services at the right time and place. ET3 aims to improve quality and lower costs by reducing avoidable transports to the ED and unnecessary hospitalizations. The key component is payment aligned with healthcare aims.

### Why GD e-Bridge

- › Documented Mobile Telemedicine - Voice, Video, Data
- › Single app for all responses - 911, ET3, MIH/CP, Disaster
- › HIPAA Secure communications & notifications with hospital, alternate destinations & providers
- › Highly configurable acute care & case workflows with metrics
- › Unparalleled feature set; live & recorded video / audio, pictures, forms, ETA tracking, text, chat, 12-leads, QA & outcome reporting

### Value for Everyone

- › Patients, Families, Communities
- › EMS, Hospital, Alternate Destinations
- › Local, Regional & State Initiatives
