

Can you answer your EMS radios remotely?

Now, where you go, your radios go too.

In a busy ED, mobility is key.

CAREpoint-RC * is a Remote Control App that runs on your iPad or iPhone to allow radio and voice call handling when and where you need it.

Do more with less time.

- Capture revenue loss from missed calls
- Positive effects on patient care and satisfaction
- Play back prior radio call remotely
- Positively influence EMS and patient handoff
- Becoming known as “The hospital that answers calls”
- Remote quality control of the ED and EMS interactions
- Additional ROI for CAREpoint workstation

“This significantly improved responsiveness in answering and assisting on calls between the EMS crews”

*Michele Kroeger, BSN, RN, CEN
EMS/Emergency Management Coordinator*

“CAREpoint-RC allows a nurse or physician to be readily available for important patient information at the touch of a finger”

*Kevin Scheibe
Emergency Services Coordinator*

Simply Powerful

What's new in v3.0

- Smart reconnect
- Connectivity status bar
- Updated backend libraries enhancing protocols
- Customizable alerts and notification workflow
- Works with blocked APN's (*non APN dependant*)

Ask for the free consult to help determine if your network is ready for flexible mobility of your inbound radio and voice communications.
