- Reduce patient handoff time + challenges
- Easily pinpoint bottlenecks
- Minimize risk while reducing costs
- Shorten door-to-treatment times by accessing online medical control

Consolidated workstation for the Hospital ED's Team Communication, Information + Documentation

THE RIGHT CARE, RIGHT PLACE + RIGHT TIME

We know hospitals are frantic and at times can literally be a matter of life and death. This is why you need your patients' pre-hospital care to be as smooth and rapid as possible while maintaining the best patient outcomes. Your ability to easily and effectively communicate and share information with paramedics in the field and with medical teams within your hospital is essential to ensuring the highest level of care. What you use today may or may not suffice, but one thing is for certain - with GD, your overall treatment capabilities will skyrocket.

The GD CAREpoint™ Workstation and GD e-Bridge™ mobile telemedicine app are used by more hospitals around the country than any other pre-hospital mobile telemedicine, communication or notification system. We empower hospitals and EMS organizations to deliver the right information and care at the right place and time.

THE MOST COMPREHENSIVE TEAM COMMUNICATION APP IN THE MARKET:

- Interactive mobile telemedicine
- Patient vitals sharing and reporting
- Medical team alerts, notification + chat
- Call/radio and interaction recording
- Unified 12-Lead management
- Instant recall and replay
- Data sharing
- ETA tracking
- Video streaming
- and so much more
