

COMMUNITY PARAMEDICINE

Mobile Integrated Healthcare

- Post hospital follow-up care.
- Reducing high utilizers' reliance on EMS, non-emergent 911 calls & ED transports.
- Community outreach to rural areas.
- Integration with health systems and agencies.
- Connecting patients to primary care services.
- Program support; mental health, overdose, chronic disease management, etc.

GD e-Bridge™
Mobile Telemedicine

GD arms EMS first responders, physicians and health care providers with mobile telemedicine solutions that enable Right care. Right place. Right time. From 911 emergencies to non-emergent Mobile Integrated Healthcare and Community Paramedicine visits in the home, GD e-Bridge™ makes it easy for medical professionals to provide simply smarter care.

You can benefit from remote medical direction, collaboration via live video conference, workflow driven processes, documentation, data sharing, alternate transport and destination decision support. We've got the app for all that + more.
