CAREpoint The best just gets better

Introducing CAREpoint-IR

Didn't quite get all the details on that last call? No problem...

CAREpoint-IR * (Instant Recall) lets you replay your most recent calls at the touch of a button.

Need to share the details of a call? Again, not a problem...

In tandem with e-Net Messenger, CAREpoint-IR lets you forward the call to an individual or group quickly, simply, and securely. Perfect for alerting cardiac, stroke or trauma teams. You can even attach a photo, form, or 12-lead.

WHY CAREpoint?

Today's healthcare demands you do more with less. CAREpoint manages all your prehospital needs to help you improve care, while saving space, time and money.

"We need to get all the necessary information about the incoming patient to downstream professionals exactly as it was received. The CAREpoint Workstation, with Instant Recall and e-Net Messenger, makes that possible."

-Scott Masters, Director
Emergency Medical Transportation
Northeast Georgia Health System

CAREpoint & Instant Recall make call handling easy ...

- **Enter** call data in CAREpoint Workstation.
- **Review/Replay** calls instantly as needed.
- **Attach** the call to a secure message & send to an individual or team
- **Receive** call on mobile device. Replay call.

* CAREpoint-IR is available as an option
