

Communication Advantages for Mobile Integrated Healthcare and Community Paramedicine Programs

Effective MIH-CP Communication

When Mobile Integrated Healthcare and Community Paramedicine teams have the resources to communicate quickly and clearly with upstream providers, patient care is more efficient, time-to-treatment is decreased, and the right care is provided at the right time and the right place.

GD's all-in-one, fully configurable communication solutions enable MIH-CP teams to work together to enhance quality of care through:

- **Pre-arrival** patient registration aimed at speeding hand-off and reducing wall time
- **HIPAA-compliant** sharing of pictures, audio, video and live streaming for real-time consultation
- **Telehealth Video Conferencing**, allowing for treat in place with reduced risk
- **Expanded access** to healthcare for those in rural areas
- **Improved quality assurance** and risk reduction documentation
- **Cost savings** on reductions in re-admits and unnecessary transports

is a communication platform that enables EMS and hospital teams to share pictures, audio, video and livestream.

Simply Seamless Patient Care.
