

# e-Bridge Alert

Providing Value to EMS and Hospitals

The use of pagers, radios, and disparate software applications by EMS and hospital team members can contribute to delays in patient care, making an all-in-one, easy to use application that covers the entire patient care process vital for prompt patient care.

## e-Bridge Alert

e-Bridge Alert enables live, HIPAA-secure communications between and among First Responder and hospital teams, including immediate alerts, pre-arrival activations and real-time ambulance tracking. Hospitals can be ready to receive the patient and apply emergency care before their arrival, saving precious minutes and improving the quality of patient care for all.

## Facts and Features of e-Bridge Alert

- Highly-Configurable & Scalable Pre-Arrival Alerts
