

Streamline Communication

Save Critical Time in Acute Care

Every second counts when caring for stroke, STEMI and trauma patients. When lives depend on the speed of treatment, efficient communication between EMS and acute care teams is essential.

GD's e-Bridge Communication Platform makes it possible to rapidly access stroke assessments, ensure trauma teams have all the necessary information prepared prior to patient arrival and so much more. Through robust HIPAA-secure live video, pictures, one-touch alerts, team messaging, data sharing and documentation, the fully-configurable e-Bridge assists EMS and acute care teams with:

Reduced door-to-treatment times and activations

Telehealth for treat in place, alternate destination and ET3

Quicker, more efficient patient hand-off

Faster time-to-treatment

Real-time communication of case to entire team

e-Bridge is an industry-leading communication platform that enables live, HIPAA-secure communications between and among EMS/fire and hospital teams through sharing pictures, audio, video and live streaming. It provides audio and visual alerts and notifications with real-time ETA tracking, and allows 12-lead management from any monitor. With a suite of highly configurable extensions, e-Bridge allows users to tailor its interface, alerts, buttons, workflow and more.

CAREpoint

CAREpoint 2 Workstation keeps all EMS communications in one place. It enhances coordination of care between communities and regions, EMS and hospitals through call management and recording (EMS radio and phone inbound calls), data sharing, unified 12-lead management and more. This single workstation can be accessed onsite and remotely to minimize communication breakdowns, risk to patients and costs.

D Scribe X enable automatic recording and reporting of data for CAREpoint and e-Bridge. They empower medical teams with secure access to all pre-hospital and hospital videos, images and voice communication, data and reports. Case management and team and process workflows are more efficient with easier access to information for quality assurance, benchmarking, certifications, training and legal purposes.
