

The **e-Bridge** Communication Platform supports the Emergency Triage, Treat, and Transport (ET3) model, a voluntary 5-year payment model providing greater flexibility to ambulatory care teams. Ensuring patients get the right care at the right place and the right time with e-Bridge's telehealth capabilities.

It's not possible to eliminate every unnecessary ER visit that could be treated in a different setting, but reducing just a fraction of those visits with ET3 can cut costs and reduce ambulance wall times at the ED.

Value of using GD Solutions for ET3:

- *Reduced wall times at the ED*
- *Accurate care for patients*
- *Improved patient satisfaction rates with improved treatment times*
- *Expanded access to healthcare for patients in rural and urban areas*
- *Save time and money by reducing unnecessary transport to the ED*
- *Reduce ED crowding and lower hospital readmissions*

e-Bridge Features that Support ET3:

- ✓ *Video Clips & Live Conferencing via Telehealth*
- ✓ *Pictures*
- ✓ *Voice and Text Messaging*
- ✓ *12-Lead & Vitals*
- ✓ *Metrics & Case Clock*
- ✓ *Video Language Interpreter*

D-Scribe X Features that Support ET3:

- ✓ *Simplified Retrieval and Sharing of Call Information*
- ✓ *Voice and Data Logging and Recording*
- ✓ *Legal Documentation and Secure Storage*
