

The CAREpoint ED Workstation is a centralized communication hub that consolidates EMS pre-arrival notifications, radio, and emergency calls into one structured interface – giving ED teams real-time visibility into incoming patients and improving readiness before they arrive.

KEY FEATURES

BENEFITS & ROI

- ✓ Minimized hardware obsolescence and increases space in the ED.
- ✓ Faster time-to-treatment.
- ✓ Easier retrieval of case information.
- ✓ Cost savings on activations, documentations, and consolidation.
- ✓ Secure archiving of communications and workflow streamlining.
- ✓ Better preparedness for incoming patients through improved EMS and hospital communication.
