

e-Bridge enables secure, real-time communication and care coordination across EMS, emergency departments, specialty teams, and hospital departments to support faster decisions and better patient outcomes.

BENEFITS

Communication & Collaboration

- ✓ Connects EMS directly with ED and specialty teams
- ✓ Strengthens EMS-hospital relationships
- ✓ Reduces communication delays and repeated phone calls

Clinical Coordination

- ✓ Facilitates telehealth consults and treat-in-place decisions
- ✓ Supports ECG transmission and multimedia data sharing
- ✓ Enables earlier stroke and STEMI activation

Continuous Care

- ✓ Enables secure, structured pre-arrival notifications from EMS
- ✓ Supports continuous case management from first medical contact in the field to completed care

REAL RESULTS

17%

Reduction in average door-to-balloon time at Baystate Medical Center.

20%

Increase in pre-hospital (EMS) STEMI activations at Baystate Medical Center.

11 Min.

Door-to-needle time for stroke care at Hackensack University Medical Center.

36 Min.

First patient contact to balloon time for STEMI care at Hackensack University Medical Center.
