CAREpoint 3 Workstation is tailored to streamline emergency care with these new features:

- **D-Scribe X Intelligence Hub** offers secure access to all pre-hospital and hospital videos, images, voice communication, data, and reports for e-Bridge and CAREpoint 3.
- **Affordable Operator Positions** allow for increased flexibility and cost-efficiency across multiple CAREpoint 3 Workstations.
- **Server-Based System** enhance security within your network, ensuring a seamless and secure system operation.
- **Remote Monitor** for CAREpoint 3 improves accessibility via a web-based system, enabling access from any computer or tablet for comprehensive information access.
- **Enhanced Intake Forms** are more intuitive, work flow-based forms that simplify the input of various patient data for different case scenarios.
- **Emergency Department Dashboard** displays a dashboard featuring incoming patient details, bed assignments, estimated ETA, and other vital patient tracking identifiers for improved preparedness.
- **Reduced Cabling** Costs allows greater flexibility and reduces the need for extensive cabling to individual workstations within the ED, minimizing installation costs
- **Enhanced User Interface** improves customization options including light/dark modes, configurable icons, buttons, and simplified search functions for improved useability
- **CAREpoint Go Mobile Position** allows access from any mobile devices, enabling on the go call handling from anywhere within the hospital

Schedule some time with your Regional Manager to learn more about the new features available!
