

Organize patient flow and assign rooms seamlessly, delivering top-notch care from the moment EMS arrives with the GD Solution Suite Emergency Department Dashboard.

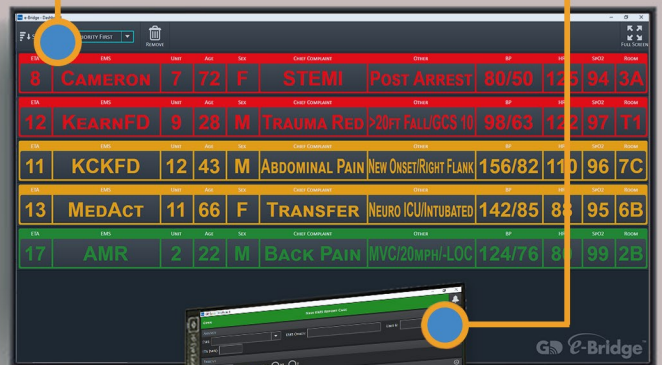

Consolidate incoming pre-hospital communications into a single platform with secure storage and features to prevent missed calls.

Display important data, such as ETA countdowns, patient demographics, chief complaint, and vitals, or any other captured data.

Configurable intake forms to capture data needed to display across the dashboard for all teams to easily view.
