

When first responders have the resources to communicate important information to hospitals quickly and clearly before the patient arrives, patient care is improved, door-to-treatment times are reduced, and valuable time and money is saved.

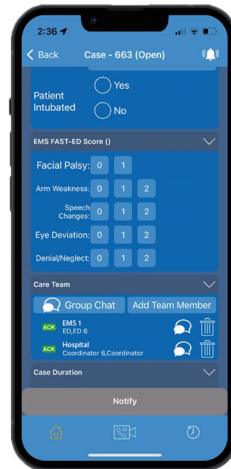

Seamless communication for all phone, email, radio, 12-Lead and data needs

Acknowledge calls with a touch of a button through a pre-recorded message

Reduce Surprise EMS drop-offs with the optional mobile add-on to take CAREpoint on the Go

CAREpoint Go

e-Bridge

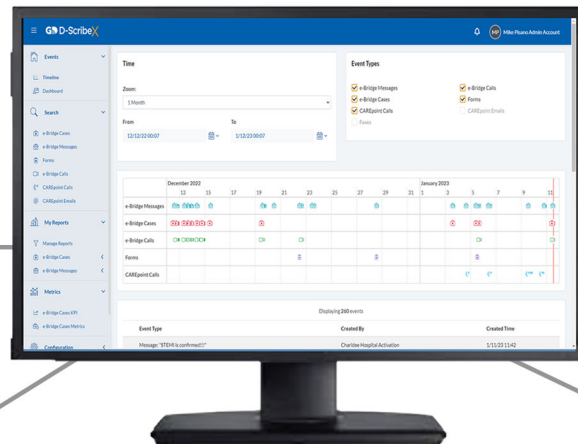

Group messaging to improve healthcare team communications

Simplified drop downs to capture patient information and vitals

Seamlessly notify and activate hospital teams of incoming patients

Easily share photos, videos, 12-Leads, live ETA, and video conference with teams

Share face sheets and outcomes data from the hospital to EMS to track and improve metrics

D-ScribeX

Automatic reporting and recording of case data

Seamlessly track every event, case, or call through CAREpoint and e-Bridge

Custom reports for managers and administrators to easily review the data they need
